🐙 Github 🔄 LeetCode 📁 Portfolio

PROFILE

System and Software Engineer with a Bachelor's degree in Computing and Data Science, offering extensive experience in full-stack development, system administration, and network engineering. Proven track record of contributing to and leading large-scale software projects, delivering scalable, maintainable, and secure solutions.

Proficient in back-end development using technologies such as **Django**, **FastApi** and **Java Spring Boot** with expertise in designing robust RESTful APIs and working with relational databases like **MySQL** and **postgresql**. Skilled in developing intuitive and high-performance user interfaces using **React.js** and **Next.js**.

PROFESSIONAL EXPERIENCE

Freelance Software Developer

08/2023 – present

- **Green Saudi Mobile Application** 📁
 - **Tech Stack** : Java Spring Boot , React Admin , Flutter
 - develop REST APIs for a mobile application aimed to combating desertification by enabling users to suggest reforestation locations via an interactive map.
 - develop an admin dashboard supporting multi-role access control
 - Deployed application services on Hostinger VPS using Docker containers, configured Nginx as a reverse proxy, and managed the MySQL database.
- **LocaLucci Admin Dashboard**
 - **Tech Stack** : React.js, Tailwind
 - Developed a web-based admin dashboard for the LocaLucci mobile application.
 - Built sales analytics and insights to help admins monitor platform performance.
 - Implemented ad management features to create, update, and control vendor advertisements and promocodes.
 - Integrate the dashboard with backend APIs to fetch, display, and manage real-time data.
- **Braille Education Platform** 📁
 - **Tech Stack** : Django REST Framework, Next.js, Docker, Apache2, MySQL
 - Built and documented RESTful APIs to support course management, student enrollment, assessments, and automated certificate generation.
 - Implemented multiple assessment types, including text-to-braille, braille-to-text, and similar-words recognition exercises.
 - Developed the frontend using Next.js and seamlessly integrated it with backend APIs.
 - Integrated Celery to handle asynchronous background tasks, including sending email notifications for password reset and email verification workflows.
 - Containerized the application using Docker for consistency across environments.
- **E-commerce Platform**
 - **Tech Stack** : FastAPI, Docker, Apache2, Celery, PostgreSql
 - Built and documented RESTful APIs for managing users, orders, and payment workflows.
 - Implemented admin endpoints to efficiently manage products, categories, and inventory (stock management).
 - Integrated Celery for handling asynchronous background tasks (e.g., order processing, notifications).
 - Containerized the application using Docker for consistent development and deployment environments.

Information Technology Engineer at WOTECH

02/2024 – present

- Managed and maintained network and server infrastructure, ensuring high availability, security, and optimal performance.
- Administered storage and backup solutions to safeguard data integrity and ensure reliable disaster recovery.
- Managed **Active Directory**, including user accounts, groups, permissions, and enforcement of security policies.
- Developed an **internal license tracking system** to monitor software license expirations and automatically send email alerts for timely renewals.

EDUCATION

Bachelor Computing and Data Science, *Alexandria University*

09/2019 – 07/2023 | Alexandria, Egypt

CGPA : 3.2

Blind Assistance System (Graduation Project) [!\[\]\(0f848bbd71cef6b345273b16f905912a_img.jpg\)](#)

09/2022 – 06/2023

- Developed a Raspberry Pi-based smart glasses system using computer vision and machine learning for real-time environmental assistance.
- Deployed deep learning models on Raspberry Pi and integrated them with a mobile application for seamless user interaction.

SKILLS

- Languages : Java, Python, JavaScript, TypeScript, SQL, HTML, CSS
- Backend : Django, Flask, FastApi, Java Spring Boot
- Frontend : React.js, Next.js, Redux, RTK Query, Tailwind, Bootstrap, Ajax
- Concepts : Data Structure and Algorithms, OOP, Solid, REST API, MVC Architecture,
- DevOps : Docker, AWS (EC2), VPS
- Tools : VS Code, Cursor, NetBeans, Git, GitHub, Postman, Insomnia

CERTIFICATES

- Meta Back-End Developer [!\[\]\(33006de4dd11f8c729ca8ca0fde0352f_img.jpg\)](#)
- Backend With Django [!\[\]\(d5f9ffa97ddb414b7e96feb8ad710c8e_img.jpg\)](#)
- Database Fundamentals [!\[\]\(d900cae4f5a7d73d67b6a98ff3e7bb9a_img.jpg\)](#)
- Supervised Machine Learning [!\[\]\(ca15981e1cca5aa5bb6984590487f7b9_img.jpg\)](#)
- Advanced Learning Algorithm [!\[\]\(bbe2f84e2181f98756cb54246365881c_img.jpg\)](#)
